RICH MEDIA/INTERSTITIALS/ PRESTITIALS/ PAGE PEELS

Rich Media

This includes a wide variety of technology-driven advertisements. Rich media includes expandable ads, site overlays, floating ads, takeovers, backgrounds, cursor ads and audio ads. These high-impact marketing vehicles can provide an exciting new way of driving new customers to your products.

Interstitials

These high-impact advertisements are presented before a content page on our websites. This is a great way to generate traffic and awareness as they have been found to drive more user clicks. These advertisements are typically full "page" (window) and presented without competing ads in the window space.

Prestitials

Imagine the results you will receive from a full "page" advertisement that is presented to the visitor before the visitor actually enters the website. This premium ad placement will bring your brand and product line to the attention of every targeted website visitor.

Page Peels

Starting as a page curl in the upper right corner of the home page, when moused over the page peels down to present a 800x600 advertisement. This dramatic presentation is certain to bring attention to your brand and visitors to your website or campaign specific landing pages.
